SUMMARY

Full-Stack Developer with 2.5 years of experience building scalable web applications using Node.js, React.js, PostgreSQL, and AWS. Skilled in microservices, RESTful APIs, and cloud deployments with Docker and CI/CD. Adept at writing clean, maintainable code and delivering performant solutions in agile environments.

TECHNICAL SKILLS

Frontend | • HTML5 • CSS3 • JavaScript • TypeScript • React.js • Next.js • Tailwind CSS • Redux • Web designing MUI
Backend | • Node.js • Express.js • REST APIs • JWT • Flask
Databases | • PostgreSQL • MongoDB • AWS RDS
Cloud & DevOps | • AWS (EC2, Lambda, S3, RDS, IAM, ECS, CloudWatch) • Docker • GitHub Actions • Firebase
Tools | • Git • VS Code • Postman
Soft Skills | • Problem Solving • Communication • Team Collaboration

EXPERIENCE

Freelance & Personal Projects | Full-Stack Developer

- Developed and deployed multiple production-ready applications using React, Node.js, and AWS.
- Collaborated in Git-based workflows following Agile principles.
- Implemented CI/CD pipelines and optimized cloud infrastructure.

PROJECTS

Chatting-App | Dm & Channel Messages — React.js, Node.js, Socket.io, Zustand, PostgreSQL

- A real-time chat application inspired by Slack, built with modern web technologies.
- User can send DM's to other users or create channels and invite others to start conversations.
- Application features user authentication, real-time messaging, channel management, and online presence tracking.

Askthesite | Web scraping — Next.js, Node.js, Express, Playwright, Tanstack-Query, Docker

- Built a full-stack async web application using Next.js, Node.js, BullMQ, PostgreSQL, and AI APIs.
- Scrape websites and generate AI-powered answers with real-time status updates.
- Containerized backend services using Docker and Docker Compose, including API, worker, PostgreSQL, and Redis.

■ View Code : [Askthesite](#)

Book My Hotel | React.js, Node.js, Prisma, PostgreSQL, AWS

- Built a scalable hotel booking platform with secure role-based authentication (Admin, Vendor, Customer).
- Integrated PostgreSQL using Prisma ORM and implemented refresh-token-based session management.
- Reduced API response times by 30% using Prisma optimization.

BookIt | Experiences & Slots — Next.js (client - server component & api's), PostgreSQL

- Complete end-to-end web application where the user can explore travel experiences.
- The user can select available slots and complete bookings
- Integrate axios for api calls.
